PCKS IP Camera Kill Switch

Description

The PCKS is a device designed to locally interrupt the power and streaming of data from an IP camera for privacy and confidentiality purposes. Typical applications are in interview rooms, interrogation rooms, hospital rooms and patient exam rooms. The PCKS is placed in-line with the camera's CAT5 Ethernet cable. 12-15vdc is applied or removed to enable or disable the camera depending on which version PCKS is ordered. A switch can be mounted on the wall of the room along with an external power source to trigger the PCKS. Other equipment that outputs a 12-15vdc 25ma power source can also be used to trigger the PCKS.

Includes:

- PCKS IP camera kill switch.
- Installation instructions.

Wiring requirements:

2 conductor 22 gauge for connecting 12Vdc trigger voltage.

Warranty

1 year parts and labor.

PCKS Specifications

- CAT5 I/O Connectors
- Terminal block for trigger Voltage
- Trigger Voltage LED indicator
- Supports 10/100M data rates
- Makes / breaks pins 1,2, 3 and 6 with relays.
- IEEE802.af A and B mode compatible
- Trigger Voltage Power: 12-15 VDC @ 25mA.
- Reverse polarity protected
- Black plastic ABS housing.
- Dimensions: L 3.3 x W 2.0 x H 1.6
- Weight 0.1lb

Two versions available:

PCKS-VE applying 12-15vdc enables camera
PCKS-VD applying 12-15vdc disables camera

Made in USA
